

Colin and Coco's Daily Maths Workout

Workout 4.9

Keep-uppI (Term 2)

KPIs for Term 2

Add and subtract numbers with up to 4-digits mentally

Know and use multiplication facts for 6, 7 and 9 multiplication tables

Know and use division facts for 6, 7 and 9 multiplication tables

Adding Mentally Workout

Workout A

$3,995 + 7 = \square$

$3,460 + 70 = \square$

$4,570 + 999 = \square$

$4,996 + 8 = \square$

$6,890 + 40 = \square$

$5,800 + 499 = \square$

$6,998 + 9 = \square$

$4,960 + 70 = \square$

$7,860 + 1,998 = \square$

$999 + 8 = \square$

$8,990 + 60 = \square$

$2,999 + 999 = \square$

$8,997 + 6 = \square$

$4,990 + 90 = \square$

$4,999 + 3,998 = \square$

Subtracting Mentally Workout

Workout B

$2,000 - 7 = \square$

$3,450 - 70 = \square$

$4,500 - 999 = \square$

$4,203 - 6 = \square$

$5,050 - 80 = \square$

$7,860 - 4,999 = \square$

$5,101 - 8 = \square$

$6,034 - 70 = \square$

$7,860 - 2,999 = \square$

$5,004 - 8 = \square$

$7,300 - 600 = \square$

$3002 - 2,998 = \square$

$9,008 - 9 = \square$

$8,497 - 900 = \square$

$9,999 - 8,998 = \square$

Times Tables Workout

Workout C

$6 \times 7 = \square$

$8 \times 7 = \square$

$9 \times 8 = \square$

$54 \div 9 = \square$

$54 \div 6 = \square$

$21 \div 7 = \square$

$36 \div 9 = \square$

$24 \div 6 = \square$

$6 \times 6 = \square$

$7 \times 7 = \square$

$9 \times 9 = \square$

$28 \div 7 = \square$

$72 \div 6 = \square$

$84 \div 7 = \square$

$108 \div 9 = \square$

$99 \div 9 = \square$

$8 \times 6 = \square$

$9 \times 7 = \square$

$9 \times 3 = \square$

$0 \times 9 = \square$

Adding and Subtracting Game

Workout D

You need:

Adding and Subtracting Game templates (see below for Game 1 and Game 2)

Card Set A (print off the cards) for each player.

Card Set B (print off the cards) for each player.

To play:

Pick Game Template 1 or Game Template 2.

Each player shuffles Card Set A and picks four cards to create a 4-digit number on the template.

Each player shuffles Card Set B and picks a card.

It is placed on the Game

Template to make a calculation.

Both players find the answer to their calculation.

To win:

The player who calculates the highest total wins a point.

The first player to get 10 points wins the Game.

Game 1

$$\begin{array}{|c|} \hline A \\ \hline \end{array} \begin{array}{|c|} \hline A \\ \hline \end{array} \begin{array}{|c|} \hline A \\ \hline \end{array} \begin{array}{|c|} \hline A \\ \hline \end{array} + \begin{array}{|c|} \hline B \\ \hline \end{array}$$

Game 2

$$\begin{array}{|c|} \hline A \\ \hline \end{array} \begin{array}{|c|} \hline A \\ \hline \end{array} \begin{array}{|c|} \hline A \\ \hline \end{array} \begin{array}{|c|} \hline A \\ \hline \end{array} - \begin{array}{|c|} \hline B \\ \hline \end{array}$$

Adding and Subtracting Cards

Set A

0

1

2

3

4

5

6

7

8

9

Set B

1,999

2,999

999

5

50

500

9

90

900

Put digits in the empty boxes to make the calculations correct.

Complete them in several different ways, where possible.

$$\square \times \square = 4 \square$$

$$6 \square \div 7 = \square$$

$$9 = \square \square \div \square$$

$$1 \square \square \div \square = \square \square$$

Are there any boxes that it is impossible to put a digit in? Why?

Are there any boxes that could have any of the digits in them?

Now complete it using the digits 0, 1, 2, 3, 4, 5, 6, 7, 8 and 9 at least once each.

Times Tables Array Investigation

Workout F

Use arrays to complete the grid such that each array contains exactly one number, and that number represents the area of the array.

One array has been completed for 9 (3×3).

									9					
			15											
													36	
				5						6				
						21								
	12								8					
								10						
6													12	
			18							3				
	4							36						
			2											
		6								6				
													9	

Word Problem Workout

Workout G

1. A football team had 2,352 fans at their match in week 1 and 2,006 fans at the match in week 2.
How many fans attended the two matches in total?
2. The Nile River is 4,404 miles long.
The Mississippi River is 3,902 miles.
How much longer is the Nile River?
3. There are 2,500 marbles in a pack.
Dan and Eric take 400 marbles each.
How many marbles are left?
4. Coco has £5000.
She buys a TV for £1,999.
She buys a computer for £500.
How much money does she have left?
5. The population of Mooseville is 1,425
The population of Cocotown is 999
What is the difference in the populations of
Mooseville and Cocotown?
6. Colin is saving to buy a car. It costs £8,500
He has saved £4,998
How much more money does he need to save?
7. The difference between two 4-digit number is 70
The numbers have a different thousands digit.
Find a possible pair of numbers.

Create your own word problems involving adding and subtracting
4-digit numbers mentally

Matching Workout

Match the calculations with the correct answer.
Fill in the missing buddies.

$2,950 + 70$		3,200
$4,100 - 900$		4,021
$5,020 - 1,999$		3,020
$2,020 + 1,999$		
$4,930 + 90$		4,019
$5,019 - 999$		3,021
		5,020

Match the calculations.
Fill in the missing buddies.

$48 \div 6$		$54 \div 9$
$56 \div 8$		$35 \div 7$
		$72 \div 9$
$63 \div 7$		$108 \div 9$
$45 \div 9$		
$36 \div 6$		$81 \div 9$
$77 \div 7$		$42 \div 6$

Create your own Matching Workouts
