

# Fluent in Five

Daily Arithmetic Practice  
Week 8

Year 6

## Year 6 - Week 8

Please note, we always recommend reading 'Your Guide to Using Fluent in Five' before using these resources with your class.

### This week in a nutshell

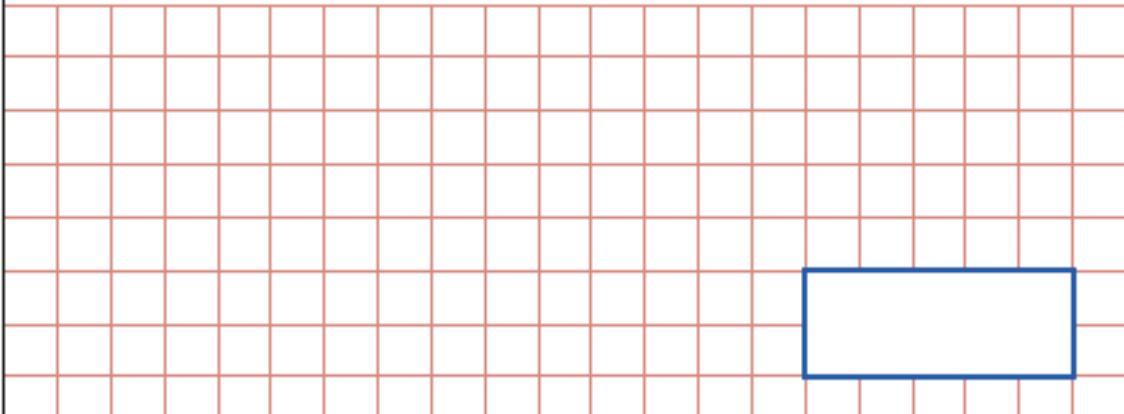

- The addition of fractions presented as mixed numbers is introduced for the first time.
- Pupils are also introduced to multiplying fractions by whole numbers.

**Note:** For both of these styles of questions, answers can be given in any equivalent form.

- Pupils are introduced to the squared notation ( $^2$ ) for the first time.
- Mental multiplication and division skills from the previous 7 weeks are recapped throughout the week.
- Written methods continue to focus on long and short multiplication, short division and addition and subtraction of large numbers.

## Answer Sheet

Remember, (M) is written next to those questions you should have tried to solve mentally first. (W) means a written method is usually more efficient for this question.

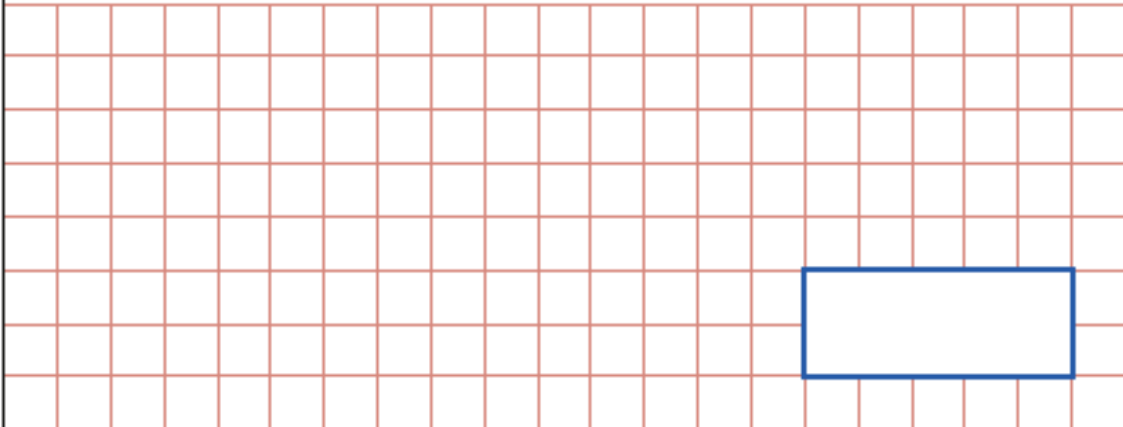

1.  $57,694 + 67,896 = \mathbf{125,590}$  (W)

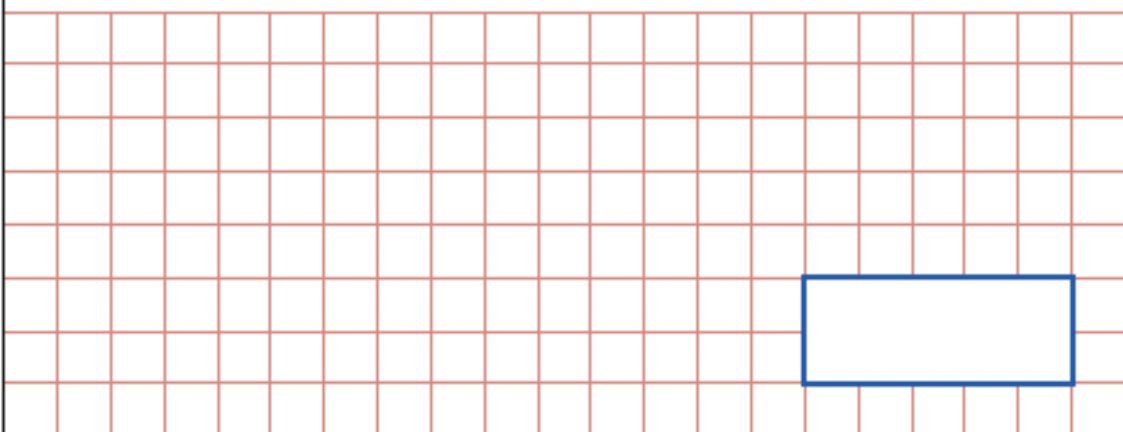

2.  $1\frac{1}{3} + 2\frac{1}{3} = \mathbf{3\frac{2}{3}}$  (M)

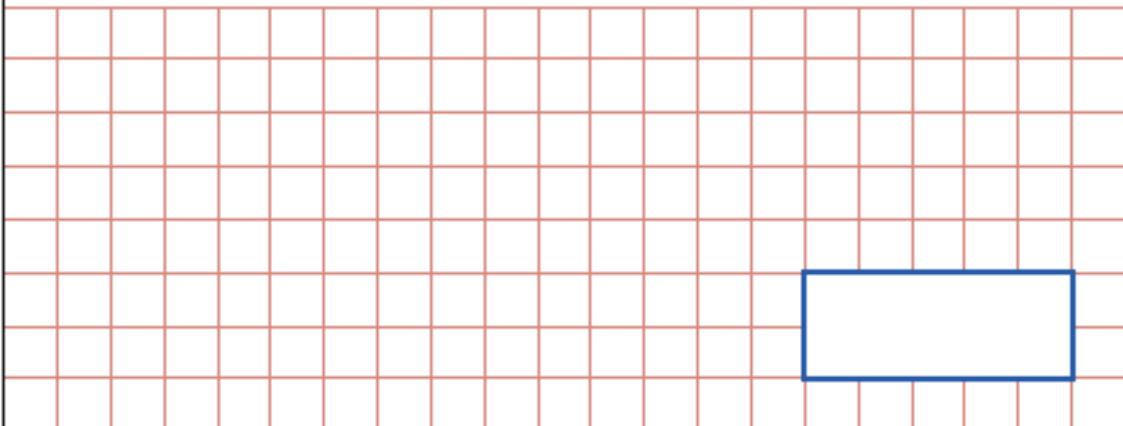

3.  $3.21 \times 3 = \mathbf{9.63}$  (M)

4.  $679,329 - 34,672 = \mathbf{644,657}$  (W)

5.  $3^2 = \mathbf{9}$  (M)
