

Maths:

This weeks MyMaths tasks are revisiting our learning on multiplication and division. In the CanDo activities, you will be recapping learning from Term 4.

Extra activities to challenge you:

- *TTR / Hit The Button*
- *Fluent in 5*
- *NCETM* <https://www.ncetm.org.uk/resources/54432>
- *5 minute frenzy*
- *White Rose Maths Hub problem of the day*
- *Practice Tables Races*

Writing and grammar:

In English, we will be using this lockdown experience as writing inspiration. You will find lots of activities in the pack based around this theme.

The tasks are great fun and although there are lots of things to do, there is no expectation for you to complete them all in one week — they are there for you if you feel up to the challenge!

Reading:

- Pick one of the suggested reading activities (Key Information page).
- Read this week's 'Picture News'. What is your opinion on what you have read?
- Check out this weeks 'First News'. You could try to complete some of their puzzles and enter one of the competitions.

Y3 Home Learning Week 11

Dear parents,

Here is an overview of the learning we would like your child to complete this week.

I will email you on Wednesday to check how you are getting on but please contact me if you have any questions in the meantime.

P.E.:

Be active and learn English at the same time! This week it is homophones. Make sure you follow the dance moves too. <https://www.bbc.co.uk/teach/supermovers/ks2-english-homophones-with-johnny-inel/z6fjbdm>

History (2 week project):

Now you have been employed as a Roman soldier, you will need to find out about the emperors you will be protecting. Follow this link which will introduce the emperors to you. <https://www.bbc.co.uk/bitesize/clips/zsf4dmn>

Use what you have learned to create a timeline. Augustus Caesar was the first but who came next? Now, choose one emperor to do further research on and create a fact-file all about him. Challenge yourself to be as creative as possible. Can you include some art work? Could you present your findings in a video or deliver it in a speech to your family?

Science (2 week project):

First, take this quiz to see how much you have learned about the life-cycle of plants. <https://www.educationquizzes.com/ks2/science/life-cycles--plants/>

Now it's your turn! Create a quiz for your classmates to test their knowledge. Use everything you have discovered about plants in your quiz. If you would like to challenge your friends, send me your quiz and I will upload it to our class page.
