

Week beginning 20th April

I can multiply fractions

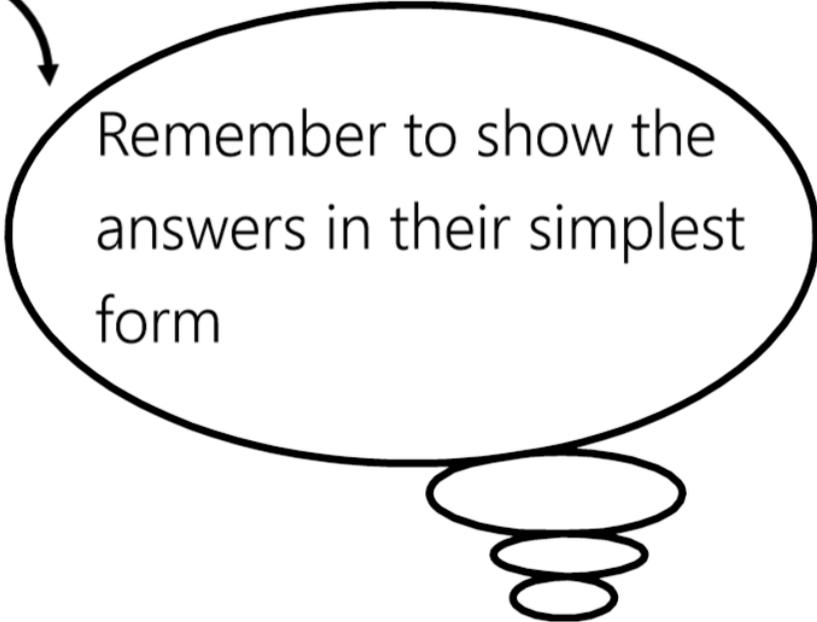

Multiplying fractions is straightforward -

$3/4 \times 1/2 =$   $\longrightarrow$  Multiply the numerators  $3 \times 1 = 3$

$\longrightarrow$  Multiply the denominators  $4 \times 2 = 8$

$\longrightarrow$  Answer =  $3/8$

$$\frac{1}{8} \times \frac{4}{6} = \frac{4}{48} = \frac{1}{12}$$

Remember to show the answers in their simplest form

Have a go at these:

$$\frac{2}{3} \times \frac{1}{6} =$$

$$\frac{3}{8} \times \frac{3}{4} =$$

$$\frac{5}{7} \times \frac{2}{5} =$$

→ When you are ready have a go at the worksheet. Choose A B or C or do a few from each
