

Recipe for making salt dough

You will need:

1 cup of plain flour (250g)

½ cup of salt (125g)

½ cup of water (125ml)

Instructions:

1. Mix the flour and the salt in a large bowl.
2. Gradual add the water mixing as you go along
3. Put your ball of dough on a floured surface and knead it a little bit.
4. Make your model.

If you don't use all of your dough it will save in the fridge in an air tight container for 5 days.

Baking:

Once you have made your model and you are happy you can leave the dough to dry or bake it in the oven. Put the oven on at its lowest setting and bake your dough for about 3 hours (until it is hard).

Leave it to cool.

If you want to decorate your sculpture you can use paints to do this but it is up to you.
